EDUCATION

University of California, Berkeley

Berkeley, CA

B.A. Data Science | Emphasis: Cognition and Psychology

Expected May 2027

- **Relevant Courses:** Data Structures, Data and Computational Structures, User Interface Design and Development, Data Visualization, Probability and Statistics in Data Science, Data Mining and Analytics, Data Engineering
- **Minor:** Computer Science
- **Certificate (In Progress):** Berkeley Certificate in Design Innovation

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL, Java, HTML/CSS, MATLAB
- **Frameworks & Tools:** React, Next.js, Node.js, Postgres, Redis, Figma, Git, Vercel
- **Product & Design:** Needfinding, Usability Testing, WCAG Accessibility, Figma-to-Code Workflows

EXPERIENCE

Software Engineering Intern

May 2026 – Present

Legali AI

Berkeley, CA

- Shipped 7 production pages (quiz, warnings, referral, share, features, contributors, branding) across web and mobile for an AI-powered legal-tech companion app using Next.js, React, Node.js, and Figma-to-code workflows.
- Built a 12-question interactive quiz feature end-to-end with multi-step state management, Web Share API integration, and WCAG-compliant accessibility across 7 supported languages.
- Merged 6 production PRs, resolving CI failures and rebase conflicts while maintaining code quality standards across a multi-language, multi-platform codebase.

Data Analytics Consultant (Extern)

Jun 2026 – Present

PwC & Center for Youth Justice

Berkeley, CA

- Audited operational youth facility data for a major NGO, identifying structural inefficiencies and systemic compliance anomalies while adhering to strict data privacy standards for sensitive minor data.
- Built data analytics pipelines and applied statistical modeling to engineer data-driven solutions, enhancing facility safety protocols and resource distribution.

Data Analytics Research Apprentice

Jan 2026 – Present

UC Berkeley Haas School of Business

Berkeley, CA

- Built automated ETL pipelines in Python (Pandas) to extract, clean, and load survey datasets for NGO-led health equity research, reducing manual preprocessing time by 4 weeks.
- Analyzed survey responses from 1,200+ participants using EDA, producing data visualizations and stakeholder-ready insights that shaped research priorities.

PROJECTS

Fed Up – Real-Time Group Dining Decision App

Personal Project

- Designed the full product in **Figma** and built it end-to-end in **Next.js**, with **Google OAuth** authentication and user data persisted in **Postgres**.
- Built a friend-sourced recommendation engine using the **Google Places API** and **Claude API**, weighting suggestions toward friends' saved picks while excluding already-visited restaurants.
- Implemented real-time group voting rooms with shareable codes using **Redis** and **Pusher**, enabling synchronized swipe-based voting across devices.

Puffin – Browser-Based Drone Simulation Dashboard

UI Design Course Project

- Designed a unified dashboard consolidating drone simulation controls, live telemetry, and ROS data, grounded in **4 needfinding interviews** with drone club members and pilots.
- Validated the design through **5 moderated think-aloud usability sessions**, measuring task completion and intervention rate to identify and fix navigation gaps.

NutriPath – RAG-Grounded Meal Planning Assistant

Personal Project

- Built a retrieval-augmented generation pipeline over cited clinical dietary rules using sentence-transformer embeddings and cosine-similarity search backed by **Redis** – achieved **72% top-1 / 90% top-3** retrieval accuracy across a 29-case evaluation harness.

LEADERSHIP

Evening with Industry Committee

Aug 2025 – Present

Society of Women Engineers

Berkeley, CA

- Organizing Berkeley's largest SWE networking event, coordinating outreach and logistics for 15-20 partner companies, a keynote speaker, and a networking dinner.
